

a world class African city

Meadowlands Zone 7

Potential interventions For Improved Safety

Streets Alive!

Aim is to create a project that will result in safe, sustainable, comfortable and convenient travel for everyone, regardless of age or ability – motorists, pedestrians, bicyclists, and public transportation users.

Great Places have Great Streets

Interventions for Road Safety

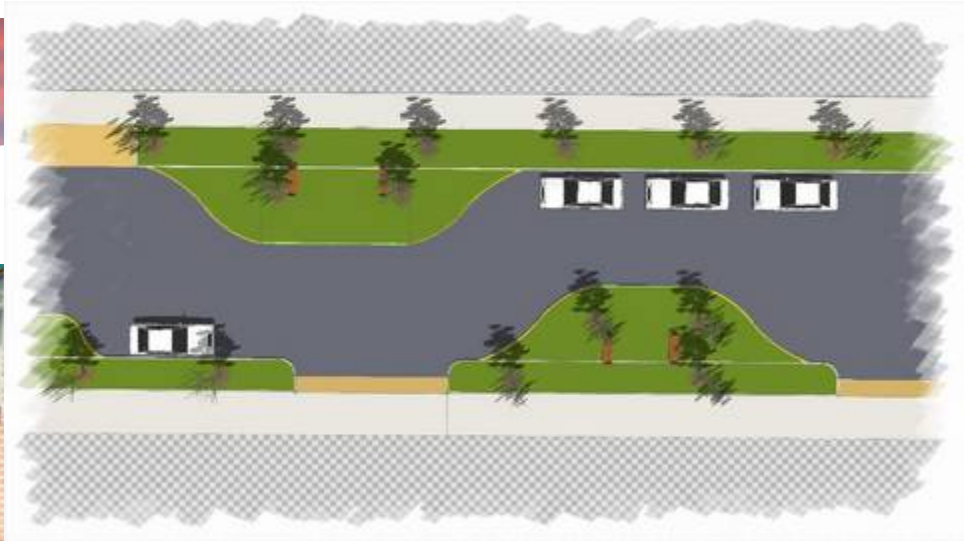

1. **Partial street closures**
2. **Curved roads, chicanes, chokers**
3. **Street painting**
4. **Creating gateways: change of surface, raised intersection, narrow width of road to indicate entering a residential area**
5. **Landscaping**

a world class African city

Curved Road, chicanes, chokers

Narrow and curve the road with landscaping

Activity	On the ground
Education	<ul style="list-style-type: none"> • Increase training of scholar patrols targeting schools around Zone 7 • Conduct community awareness on Road Safety • Information board on what developments will take place • Local Newspaper articles on road safety tips • Periodic media briefings and interviews
